

## Online Tracking of Vehicles on your Mobile Phone with Maps

### Phone Requirements

1. GPRS Enabled Handset (EDGE Preferred) OR CDMA with Net connectivity
2. Handset should have JAVA capabilities. (Most GPRS phones have this capability)
3. GPRS Enabled SIM Card.
4. Your Organization ID in [www.nilsontechnology.net](http://www.nilsontechnology.net).  
You can login to you're a/c <http://www.nilsontechnology.net> account and on dashboard page itself you can see your organization ID. This is normally your company name.

### Steps to View Vehicles on Google Maps For Mobile

For Graphical snapshots visit [Graphical step by step instructions to configure Cellphone](#)

1. Browse <http://google.com/gmm> on your phone Browser
2. Install the GMM Application (Google Maps for Mobile)
3. Open Google Maps for Mobile on your mobile phone or PDA (Download it here)
4. Select "Find Business"
5. Select "Enter a new search"
6. Type in:

The Base URL is [http://wap.gpsintegrated.com/kml/<ORG\\_ID>.kml](http://wap.gpsintegrated.com/kml/<ORG_ID>.kml)

You need to replace <ORG\_ID> with your actual organization ID in GPSintegrated.com dashboard.

For testing you may use url <http://www.nilsontechnology.net/kml/online.kml> which is for demo account. This url is for demo purpose only for organization ID "online", you need to provide url with your own organization ID.

7. The Above URL will show you Last Locations of all your Vehicles, on the BASE GOOGLE MAPS.
8. Numbers on the Placemarks represent, their shortcut keys for accessing them thru phone Keypad

**Note:** Google Maps For Mobile does not currently supports Web Authentications as like Google Earth. Due to this if someone else know your URL, they may also see your location data.
